

Internet safety guides.

Make sure to monitor your children's online apps and public things. If you don't tell them anything about Internet safety then you may be in big trouble because...

- 1.They could speak to strangers (they may think that they are their friends but you never know.
- 2.The stranger could ask to meet your child and they don't know and they go missing.
3. You will be a bad parent and feel guilty because you had never told them about Internet safety and it's mostly your fault.

So make sure you tell your children today! Make sure you do it before it's too late! :)

Want more Facts?

How to make your child's account more safe so it does not get hacked.

1. A strong password.
2. Keep track of your childrens browser.
3. Don't click on things you don't trust.

4. Make sure you're up to date with good security software.
